

Capability Statement

Company Overview

CenTex Printing, Inc. is a commercial printing manufacturer based in Temple, Texas, providing in-house production of printed materials for businesses, organizations, industrial clients, and government-related work.

All production is handled internally to maintain control over quality, consistency, file handling, and turnaround. Our workflows are structured to support both standard commercial projects and work performed under defined contract requirements.

Core Capabilities

- Commercial digital printing
 - Large format printing
 - technical manuals printing
 - industrial labels and barcode printing
 - compliance labels and warning decals
 - Marketing and business print materials
 - Variable data printing
 - Short-run and mid-volume production
 - Finishing and bindery services
-

Production Capabilities

- High-volume digital press production
- Large format printing for signage and displays
- In-house cutting, trimming, laminating, and finishing
- Custom sizing, substrates, and print specifications
- Structured file review and print-ready workflows

Government & Defense Support

CenTex Printing supports prime contractors, subcontractors, and organizations operating under federal procurement requirements.

We understand that compliance is defined by the contract—not assumed—and we review applicable FAR and DFARS clauses prior to accepting work.

When required, we align with provisions related to:

- FAR 52.204-21 safeguarding requirements
- DFARS 252.204-7012 covered defense information
- NIST SP 800-171 assessment expectations
- Domestic sourcing and flow-down obligations

We coordinate with prime contractors and compliance teams as needed to confirm expectations before production begins.

Controlled Information & Security Practices

We recognize that certain projects involve sensitive or controlled information and require additional safeguards.

Our internal controls include:

- Restricted production areas with limited personnel access
- Controlled digital file handling procedures
- Segmented workflows for sensitive print jobs
- Ability to schedule secure production windows
- Network isolation and offline production capability when required
- Secure deletion of customer files following job completion
- NDA and confidentiality compliance

These practices are applied based on project requirements and contractual obligations.

Production involving controlled information, CUI, or contract-specific safeguarding requirements is restricted to our internal, controlled workflows. We do not outsource

CenTex Printing Capability Statement

work that falls under these conditions and will decline projects that cannot be completed within our established controls.

Differentiators

- Structured workflows for controlled and contract-based work
 - Ability to operate production equipment in isolated or offline environments
 - Flexible scheduling for sensitive or restricted print jobs
 - Experience supporting industrial and regulated business environments
 - Direct communication and responsiveness for project coordination
-

Markets Served / Past Performance

We support a range of industries that require consistent, reliable print production:

- Manufacturing and industrial companies
- Construction firms
- Educational institutions
- Healthcare providers
- Corporate and B2B organizations

Our experience includes ongoing production for organizations that require dependable turnaround, consistent quality, and clear communication throughout the job lifecycle.

Quality & Reliability

- Quality control at all stages of production
 - Consistent print standards across repeat orders
 - Reliable turnaround times
 - Nationwide shipping and fulfillment
-
